[Top Rated Seller on Fiverr](#)

PROFESSIONAL SUMMARY

I am a Frontend and Full-Stack Developer with around 3 years of experience building fast, scalable web applications. I work mainly with React, Angular, TypeScript, and Node.js, and I'm comfortable handling the full development process, from turning Figma designs into clean, responsive UIs to integrating APIs and working on backend logic.

Alongside my development work, I am a Top Rated Seller on Fiverr, where I've consistently delivered projects for clients around the world.

TECHNICAL SKILLS

Languages & Markup: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend Frameworks: React.js, Angular

State Management: Redux, NGRX

Backend & APIs: Node.js, REST APIs, Firebase, Supabase, MySQL

Styling: Tailwind CSS, CSS Preprocessors (SASS/LESS)

DevOps & Tools: Docker, Git & GitHub, Postman, CI/CD Pipelines

Cloud Platforms: AWS, Google Cloud, Azure

AI & Productivity: ChatGPT, Claude (design-to-code conversion, UI ideation, workflow automation)

WORK EXPERIENCE

Software Engineer · S4N

November 2024 – Present

- Built a fully featured analytics dashboard with dynamic filtering, sorting, pagination, and interactive charts; implemented a nested patient profile dashboard within the same interface.
- Developed a Dynamic SQL Filter system enabling clients to construct custom data queries without writing code, significantly reducing time-to-insight for non-technical stakeholders.
- Constructed UI components pixel-perfectly from Figma designs using React and Tailwind CSS, ensuring responsive, accessible layouts across devices.

- Engineered an AI-powered compliance and certification workflow: generated criteria via AI, built an interactive questionnaire that feeds into an AI model recommending relevant standards, contracts, and regulations.
- Integrated an automatic evidence collection pipeline using cloud connectors (e.g. OneDrive) and built a task assignment module enabling delegation of compliance work across team members.
- Leveraged AI tools (ChatGPT, Claude) to accelerate UI design ideation, convert mockups to production-ready code, and streamline development workflows, reducing feature delivery time and increasing overall team productivity.

FREELANCE PROJECTS (FIVERR — TOP RATED SELLER)

May 21 – November 24

Data Conflict Visualizer — Browser Extension

- Built a JavaScript browser extension that detects and visually highlights data conflicts on webpages by sending page content to an external server for JSON-LD comparison.
- Diagnosed and resolved a critical detection gap, improved conflict identification from 3 out of 14 elements to 100% accuracy by reworking the DOM traversal and matching logic.

Multi-Step Form — React Progressive Web App (PWA)

- Developed a responsive, mobile-first multi-step form as part of a PWA, integrating multiple third-party APIs based on client-provided Figma designs and Postman API specifications.
- Ensured seamless cross-device experience across mobile and desktop with smooth step transitions and robust form state management.

PDF Chat Platform — AI-Powered Document Interaction

- Implemented a core feature allowing users to create lists, upload PDFs, and interact with document content through an AI-powered chat interface that returns contextually accurate answers.
- Handled file upload flows, PDF storage, and integration with an AI language model backend to enable natural language querying of uploaded documents.

EDUCATION

Bachelor of Science in Computer Science · *University of Engineering and Technology, Taxila*

2018 – 2022
